If you design a proper and modern UI dashboard, it will give the users easy access to the information they need. For this to happen, the dashboard information needs to be easy-to-scan and contain only the key information. But, with many tools available, it can be hard to make the right choice or not exaggerate with the use of features.

This is one of the many [roles of a UX designer](#) and as such, it demands knowing certain tricks to be handled the right way.
